Visitor Centers Protocols

Updated June 8, 2020

Schramsberg and Davies Vineyards are fully committed to take every step possible to protect employees and guests who visit our properties. As a company, we have adopted new visitation measures that are consistent with our existing COVID-19 Infectious Disease Prevention and Response Plan.

The following protocols are just an example of our commitment to provide a safer environment to our employees and guests.

- All employees are health screened at the beginning of their work shift
- Employees who develop COVID-19 symptoms are immediately sent home or to medical care
- Employees maintain robust personal hygiene protocols
- Tasting areas are thoroughly cleaned and disinfected after each tasting appointment with approved disinfectants used against COVID-19.
- We prioritize open space tastings areas to adhere to maximum distancing.
- Glassware is properly washed and stored away from customers and staff until ready for use.
- Tasting menus and promotional materials are not reused.
- Food pairings are handled with specific COVID-19 guidelines on safe food preparation, handling and service.

We look forward to your next visit with us as we make the best of a difficult situation, giving promise to better days ahead!

Liability Waiver

By booking a visit or tasting, I'm acknowledging the contagious nature of the COVID-19 virus and voluntarily assume sole responsibility for any injury to myself, including, but not limited to, personal injury, illness, disability, death, damage, loss, claim, liability, or expense, of any kind, that I may experience or incur in connection with my visit to or participation in tours and tastings at Schramsberg Vineyards or Davies Vineyards ("Claims").

I also agree to take appropriate precautions and follow all protocols established by Schramsberg Vineyards or Davies Vineyards.

Additionally, I specifically acknowledge my obligation to participate only if I am experiencing no COVID-19 symptoms and any health conditions that are known to increase my likelihood of experiencing injuries or make me more susceptible to illness.
